Annual management charge	0.3%
Total Cost of Investment	0.45%

Portfolio Objectives

The primary objective of this portfolio is to preserve capital. The portfolio is diversified across a range of asset classes but with a low overall allocation to funds investing in equities (expected to be no greater than 40%) and other risk assets. Target Volatility: 2%-4.75%

Sustainable philosophy

The ultimate goal of the portfolio is to support more inclusive social and economic development and more sustainable environmental and business practices, whilst generating strong and consistent investment returns. The portfolio will aim to achieve this by investing in a diversified range of funds which include themes such as renewable energy, financial inclusion, education, social housing, climate change action, sustainable waste management and renewable material production.

Monthly investment update

In March, equity markets continued to post strong performance in the month, with the S&P 500, the EuroStoxx 600 and the Nikkei 225 all registering gains. But the top performer in March was the FTSE 100, as increases in oil prices and other commodities helped push the resource-heavy index higher.

Investors found reassurance from the Federal Reserve Chair Jerome Powell's remarks on inflation, which eased concerns, signalling a potential for three rate cuts this year. Across the Atlantic, the ECB hinted at upcoming rate cuts in June, contrasting with the Bank of England's decision to maintain rates at 5.25%, albeit with hints of future easing.

The most important central bank activity last month came from the East, with the Bank of Japan (BoJ) abandoning its negative interest rate policy and altering its asset purchasing programme. This was the first time the BoJ raised rates in 17 years.

Overall, global stock markets rallied, reflecting growing confidence in a soft landing. Nonetheless, the persistence of high interest rates underscored the importance of resilient businesses.
