

EPIM Cabot Balanced

as at 30 April 2026

Objective

These discretionary managed model portfolios offer risk-profiled investment solutions, all of which have a dynamic top-down asset allocation strategy implemented using low cost index tracking funds. The investment objective for the EPIM Cabot Balanced Model Portfolio is to provide a long-term total return which is superior to the UK CPI inflation rate plus 2%. The performance of the model portfolio is not intended to track the rise (or fall) of any specific index.

Key facts

Inception Date	September 2012
No. of Holdings (incl. Cash)	21
Total Portfolio Yield*	2.45%
Minimum Suggested Investment	£ 1,000

*The yield is calculated by FE Fundinfo using a weighted average of the previous 12 months' dividend information for each portfolio holding and does not represent guaranteed or future income.

Charges

Annual Management Charge (AMC)	0.20%
Total Ongoing Charges (of underlying funds)	0.11%
Transactional & Incidental Charges	0.02%
Portfolio Total Ongoing Change	0.33%

Ratings and Platforms

Performance (%)

Meet the Team

The Charles Stanley team has a long track record of delivering investment solutions through a disciplined, actively managed approach to asset allocation. We believe that asset allocation is the primary driver of long-term investment returns. Our multi-asset, investment process enables us to dynamically allocate across global equities, fixed income, alternatives and cash. This allows us to construct portfolios that are diversified not only by geography and sector, but by asset class behaviour. We are strong advocates of active management, regardless of whether your portfolio is implemented using passive, active or direct securities.

Important Information

The value of investments, and any income derived from them, can fall as well as rise and may be affected by exchange rate variations. Investors may get back less than invested. Performance is calculated on a Total Return basis using a notional portfolio in FE Analytics (FE). Performance is net of Charles Stanley investment management fees but not adviser fees nor platform costs. Any charges and fees applied by platforms and/or authorised intermediaries will be charged in addition to the charges shown. The Total Ongoing Charges Figure (TOC) is calculated on a periodic basis using a weighted average of the most recent publicly available Total Ongoing Charges for the underlying investments as at the date of the factsheet. This includes the underlying funds' Ongoing Charges Figure plus Transaction costs plus Incidental costs. Please note that whilst we endeavour to show all charges associated with specific funds, sometimes this is not possible due to the information not being made available by the fund provider. In such cases transactional or incidental cost information may be missing. The Indicative Yield is provided for guidance purposes only as is calculated on a periodic basis using a weighted average of the most recent publicly available income yields for the underlying investments. Yields for the underlying funds, and thus for the strategy, are likely to differ in future. The Indicative Yield does not represent guaranteed income. Portfolios linked to this Model Portfolio may not exactly replicate the model due to difference in timing of initial investment or rebalancing differences resulting from minimum transaction size limits on platforms. The management and rebalancing of this Model Portfolio does not take Capital Gains Tax into consideration. This factsheet has been prepared for information purposes only and does not constitute advice or a personal recommendation, nor does it constitute an invitation to purchase units or shares. The information on which document is based is deemed to be reliable. Charles Stanley has not independently verified such information and its accuracy or completeness is not guaranteed. Although Charles Stanley's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of ESG Parties warrants or guarantees originality, accuracy and/or completeness, of any data herein expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Further, none of the information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them.
