Portfolio information

Launch date	June 2020
Min cash holding	2.00%
Annual management charge	0.30%
OCF	0.41%

Sustainable Philosophy

The ultimate goal of the portfolio is to support more inclusive social and economic development and more sustainable environmental and business practices, whilst generating strong and consistent investment returns. The portfolio will aim to achieve this by investing in a diversified range of funds which include themes such as renewable energy, financial inclusion, education, social housing, climate change action, sustainable waste management and renewable material production.

Investment highlights

Global markets entered September on a more cautious footing after a strong run through the summer. Equities remain supported by resilient corporate earnings and continued enthusiasm around artificial intelligence, with Asian technology stocks particularly strong. However, the backdrop has become more challenging as higher oil prices and renewed geopolitical tensions have increasedconcerns about inflation.

Interest rates remain a key focus for investors. Stronger than expected US employment data has reduced expectations of near-term rate cuts, while rising energy prices could keep inflation elevated for longer. This has pushed government bond yields higher and created some pressure on more highly valued areas of the equity market, particularly technology. For investors, this reinforces the value of diversification across regions, sectors and asset classes rather than relying too heavily on a single market theme.

Model description

The objective of this portfolio is to preserve capital. The portfolio is diversified across a range of asset classes but with a low overall allocation to funds investing in equities (expected to be no greater than 35%) and other risk assets. Target Volatility: 2.8% - 5.0%. The portfolio is invested in line with the LGT WM Sustainable investment Framework, which aims to identify companies and assets with strong sustainability characteristics as well as those that provide solutions to environmental and social challenges. The portfolios have formal exclusions on controversial weapons, thermal coal, alcohol and tobacco.

Important information

LGT Wealth Management's fees for the management of model portfolios should be VAT exempt and it treats such fees accordingly. However, the firm is aware that the VAT liability of model portfolio management services is due to be reviewed by HM Revenue & Customs. If it is determined that such services should be subject to VAT, it will be necessary for LGT Wealth Management to add VAT to its fees.

The performance of actual portfolios linked to this Model Portfolio may differ from the performance of the Model Portfolio shown herein due to certain funds contained in the Model Portfolios not being made available for investment into actual portfolios by some investment platforms, the variation in timing of the initial investment or rebalancing differences resulting from minimum transaction size limits on the investment platform.

The Model Portfolio Service is not a financial instrument. The portfolio will consist of financial instruments, which when considered together as the Model Portfolio Service have a target market consistent with the needs of retail clients. This publication is marketing material. It is for information purposes only. The information presented herein is for illustrative purposes only and does not provide sufficient information on which to make an informed investment decision. This document is not intended and should not be construed as an offer, solicitation or recommendation to buy or sell any specific investments or participate in any investment (or other) strategy. It is recommended that potential investors should seek advice concerning the suitability of any investment from their Financial Adviser. Potential investors should be aware that past performance is not an indication of future performance and the value of investments and the income derived from them may fluctuate and they may not receive back the amount they originally invested. The tax treatment of investments depends on each investor's individual circumstances and is subject to changes in tax legislation. The performance of actual portfolios linked to this Model Portfolio may differ from the performance of the Model Portfolio shown herein due to the variation in timing of the initial investment or rebalancing differences resulting from minimum transaction size limits on the investment platform.
