Performance is as at the return date on the above table and is expressed in percentage terms. It is calculated by taking the change in monthly net values, reinvesting all income and capital gains, and dividing by the starting net asset value. The total returns account for management, administrative and other costs taken from fund assets (but do not include the DFM fee). Performance figures are shown in pound sterling. Performance may deviate from performance provided by the platform.

Performance is sourced from Morningstar Direct. Performance prior to the HRIS inception date of July 2023 is provided by Brewin Dolphin for all funds except for EPIM Brunel Equity Focused Portfolio. Past performance is not a reliable indicator of future results.

The document is based on using data at the time of the relevant preparation and analysis, sourced where appropriate from Fund Managers. Whilst HRIS uses reasonable efforts to obtain information from sources which it believes to be reliable, HRIS makes no representation that the information in this document are accurate, reliable or complete. The information contained in this document should not be construed as a solicitation or offer nor recommendation to acquire or dispose of any investments. Please note the value of investments, and income from them, may fall as well as rise. This includes equities, government or corporate bonds, and property, whether held directly or in a pooled or collective investment vehicle. Further, investments in developing or emerging markets may be more volatile and less marketable than in mature markets. Exchange rates may also affect the value of an overseas investment. As a result, an investor may not get back the amount originally invested. Past performance is not a reliable indicator of future performance. End client portfolios performance might differ depending on timing of investment and should refer to periodic reports for actual performance.

RISK WARNING

The value of your investments and the income from them may go down as well as up and neither is guaranteed. Investors could get back less than they invested. Past performance is not a reliable indicator of future results. Changes in exchange rates may have an adverse effect on the value of an investment. Changes in interest rates may also impact the value of fixed income investments. The value of your investment may be impacted if the issuers of underlying fixed income holdings default, or market perceptions of their credit risk change. There are additional risks associated with investments in emerging or developing markets.
