

EPIM Cabot Cautious

Investment objective and policy

These discretionary managed model portfolios offer risk-profiled investment solutions, all of which have a dynamic top-down asset allocation strategy implemented using low cost index tracking funds.

The investment objective for the EPIM Cabot Cautious Model Portfolio is to provide a long-term total return which is superior to the UK CPI inflation rate. The performance of the model portfolio is not intended to track the rise (or fall) of any specific index.

Key facts

Inception Date	30/09/2012
Typical Growth / Defensive Split	10:90
Annual Management Charge	0.20%
Total Ongoing Charges (of underlying funds)	0.10%
Portfolio Total Ongoing Charge	0.30%

Global markets delivered a mixed but eventful June, with equities surging to record highs while bond markets signalled growing unease over fiscal risks. In developed markets, the S&P 500 and Nasdaq 100 led the charge to new peaks, with emerging market equities also delivering a strong performance. The Trump administration doubled tariffs on steel and aluminium imports to 50%, reviving fears of a broader trade war – particularly with China and the European Union – and casting a shadow over corporate earnings forecasts for the second half of the year.

In addition, President Trump’s 90-day pause on the introduction of “Liberation Day” tariffs is nearing its end, with the deadline for negotiations expiring on 9 July. Another Trump policy has been impacting bond markets: the yield on the US 10-year Treasury rose to its highest level since 2007, just before the global financial crisis. The catalyst was mounting concern over the fiscal implications of the president’s proposed “Big Beautiful Bill” tax cuts, which analysts estimate could add \$1.7 trillion to the national deficit by 2034. Investors demanded higher yields to compensate for the growing supply of US debt, and the dollar weakened as foreign buyers hedged against fiscal instability. The bill also fuelled gains in defence, industrials, and technology equities.

Meanwhile, long-simmering tensions between Iran and Israel erupted into open conflict, triggering a sharp reaction in global energy markets and raising fears of a broader regional war. The crisis escalated after Israel launched a series of coordinated airstrikes on Iranian nuclear and military facilities. The US maintained a posture of strategic ambiguity but participated in a bombing campaign. However, as the month progressed, oil prices eased amid signs of de-escalation.

The Federal Reserve held rates steady, citing stable inflation and improving growth, but warned of potential volatility ahead as trade tensions and fiscal uncertainty continue to loom. Overall, June underscored the market’s delicate balance between optimism and caution.

Important Information

Certain information ©2023 MSCI ESG Research LLC. Reproduced by permission

The value of investments, and the income derived from them, can fall as well as rise. Investors may get back less than invested. Returns may be affected by currency exchange rate fluctuations.

Performance is calculated on a Total Return basis using a notional portfolio in Financial Express Analytics. Performance is net of Eden Park Investment Management fees but not adviser fees nor platform costs. Any charges and fees applied by authorised intermediaries will be charged in addition to the charges shown. The Total Ongoing Charges Figure (TOC) is calculated by Financial Express Analytics using a weighted average of the underlying investments and represents underlying Ongoing Charges Figure plus Transaction costs plus Incidental costs for those holdings. Portfolios linked to this Model Portfolio may not exactly replicate the model due to the difference in timing of initial investment or rebalancing differences resulting from individual portfolio circumstances. The management and rebalancing of this Model Portfolio does not take Capital Gains Tax into consideration.
